

Of course, when it comes to digital typesetting, (Knuth [1984] 1986) is often one of the first references that comes to mind.

But there are many other interesting resources on the subject. Have you checked them all? Here is a suggested reading list, with references in Chicago author-date style.

Cozens, Simon. 2017. "SILE: A new typesetting system." *TUGboat* 38 (1): 23–27.

Cozens, Simon, Caleb Maclennan, Olivier Nicole, and Didier Willis. 2014–202X. *The SILE Book*.

Kernighan, Brian W., and Lorinda L. Cherry. 1975. "A system for typesetting mathematics." *Communications of the ACM* 18 (3): 151–157.

Kingston, Jeffrey H. 1993. "The design and implementation of the Lout document formatting language." *Software - Practice and Experience* 23 (September):1001–1041.

———. 2023. *An Expert's Guide to the Lout Document Formatting System*. R3.41.

———. 2023. *A User's Guide to the Lout Document Formatting System*. R3.41.

Knuth, Donald E. (1984) 1986. *The TeXbook*. Addison-Wesley.

———. 1999. *Digital Typography*. CSLI Lecture Notes 78. Center for the Study of Language and Information.

Lamport, Leslie. 1994. *LaTeX: A document preparation system*. 2nd ed. Addison-Wesley.

Mädje, Laurenz. 2022. "Typst: A Programmable Markup Language for Typesetting." Technische Universität Berlin.

Mittelbach, Frank, Michel Goossens, Johannes Braams, David Carlisle, and Chris Rowley. 2004. *The LaTeX Companion*. 2nd ed. Addison-Wesley.

Plain TeX might not be used as much as it used to be, but LaTeX is still very popular (Lamport 1994). There are always lessons to be learned from these mighty predecessors, which kept evolving over the years (Mittelbach et al. 2004).

In the 1990s, Jeffrey Kingston imagined the Lout typesetting system. Once hyped as a potential successor to TeX, it failed to attract traction, but it is still an interesting read (Kingston 2023).

Simon did a great job at introducing SILE in a seminal article published in *TUGboat* (Cozens 2017). Lots of things have happened since then, and the project has evolved a lot since the early days (Cozens et al. 2014–202X).
